December 22, 2025 at 12:55 PM

1. Which risk response aims to eliminate the threat entirely?

A. Avoid

B. Mitigate

C. Transfer

D. Accept

Your answer is missing

Explanation: Avoidance removes the threat by changing the project plan.

2. Which stakeholder engagement strategy aims to increase stakeholder support?

A. Proactive engagement

B. Passive engagement

C. Reactive communication

D. Restrictive reporting

Your answer is missing

Explanation: A proactive engagement strategy helps increase stakeholder support and reduce resistance.

3. What is a secondary risk?

A. A risk created by implementing a response

B. A low-priority risk

C. A risk that has no owner

D. A closed risk

Your answer is missing

Explanation: Secondary risks arise as a direct result of implementing a risk response.

4. Which document defines how project changes will be managed?

A. Change Management Plan

B. Issue Log

C. Risk Response Plan

D. Stakeholder Register

Your answer is missing

Explanation: The Change Management Plan defines procedures for managing changes.

5. Which factor can increase stakeholder conflict?

A. Unclear expectations

B. Frequent communication

C. Effective planning

D. Well-defined roles

Your answer is missing

Explanation: Unclear expectations commonly cause stakeholder conflict.

6. What is a key goal of stakeholder engagement?

A. Ensure stakeholders are engaged and expectations are managed

B. Limit stakeholder participation

C. Assign stakeholders to project tasks

D. Avoid conflicts by restricting communications

Your answer is missing

Explanation: Stakeholder engagement ensures stakeholders are appropriately involved and their expectations are managed.

7. Which document outlines stakeholder communication requirements?

A. Communication Management Plan

B. Risk Response Plan

C. Scope Baseline

D. Quality Report

Your answer is missing

Explanation: The communication management plan defines what, when, and how communication occurs.

8. Which response maximizes a positive risk?

A. Exploit

B. Transfer

C. Mitigate

D. Avoid

Your answer is missing

Explanation: Exploitation ensures the opportunity is realized.

9. What is a risk response strategy for negative risks?

A. Mitigation

B. Exploit

C. Enhance

D. Share

Your answer is missing

Explanation: Avoidance, mitigation, transfer, and acceptance are strategies for negative risks.

10. When should a risk owner be assigned?

A. During risk planning

B. After risks occur

C. During project closing

D. Before developing the charter

Your answer is missing

Explanation: Risk owners are assigned during risk management planning.

11. What is the purpose of the Work Breakdown Structure (WBS)?

A. Break down project deliverables into manageable components

B. Assign resources to tasks

C. Document project risks

D. Provide procurement requirements

Your answer is missing

Explanation: The WBS decomposes project deliverables into smaller, manageable components.
